

Eligibility Verification

Passport Eligibility Verification provides individual payer eligibility and benefit data on a real-time basis. This tool is useful at both the front-end, during patient registration, and at the back-end, for billing and collections.

Being able to immediately verify a patient's eligibility/benefit information at the point of patient access is critical. The only way this can be done consistently is to have a tool that is readily available, inexpensive and easy to use. Leveraging the efficiency of the Internet, our Eligibility service is accessible via a browser, requires no software or licensing fees and complements workflow.

Passport Eligibility tool includes an extensive list of payers to verify patient eligibility and benefits data. Our tool allows you to submit patient information and receive a coverage response immediately.

Many providers waste countless hours verifying patient eligibility via the telephone and fax. With Passport's eligibility service you can dramatically improve efficiency.
