PatientGive

Make a difference by helping patients in need raise money for their medical bills

When illness strikes and medical bills become unaffordable for your patients, make a difference by giving your patients PatientGive, a medical billing fundraising tool. PatientGive helps patients raise money online from family and friends to help them cover their medical bills from your hospital. Patients create a simple fundraising page from your online business office and share their page via Facebook, Twitter and email to spread the word. All donations go directly to the hospital's bank account to pay off the patient's medical bills.

In the United States today, 61% of all bankruptcies are due to medical bills and 14% of the medical bankruptcies occur because of a sick child. With rising out-of-pocket expenses, there has never been a better time to partner with Passport. Let us help you make a difference in the lives of your patients struggling with medical debt with our simple and secure fundraising tool, which comes fully integrated in Passport's Online Business Office, PatientSimple.

PatientGive is a gift worth giving to your patients and your community.

Features

- Patients create a custom fundraising page in 7 easy steps, with room for a personal message, photo, video and comments from friends and family

- Patients select the hospital accounts from your online business office to add them to their fundraising page
- 100% of donations to the patient's fundraising page go directly to the patient's account via the hospital bank account
- Friends and family can post a link to the fundraising page on their Facebook site to help the patient reach people beyond their immediate circle of friends
- Patients can add new accounts to the fundraising page and self-manage their page
- Companies can promote their employee's fundraiser on their website

Benefits

- Improves self-pay collections and reduces bad debt
- Reduces patient's stress associated with medical bills, helping their healing process
- Enhances patient satisfaction by making a difference in patient's life after their service
- Builds the hospital's brand and the benefits it offers the community

Like

In the summer 2007, when Laura was only seven-weeks-old, she was diagnosed with leukemia. In the beginning of the story on the night when Laura was having trouble breathing and we took her to the hospital's emergency room, we thought she might be suffering from a cold or asthma. Once at the hospital, we were told it was something much worse. Our little baby girl was suffering from anemia and her spleen and liver were enlarged due to a large number leukemia cells. Laura had biphenotypic leukemia.

Laura would need chemotherapy and a bone marrow transplant. We keep a journal of Laura's battle with Biphenotypic Leukemia to keep all the people who love Laura updated on her life and progress. It's her ongoing story.

On May 20th of this year, Laura celebrated her 4th birthday. The birthday party was held for the friends and family who emailed through the months with encouragement, strangers who emailed and said, "You don't know me but...", for everyone who made a little bracelet, bought a Laura bracelet, who raised money for Laura, who gave money for Laura, who looked after Laura, who donated blood or signed on with Bone Marrow Donor Registry.

Make a Donation

You can help the Smith family meet their fundraising goal. All donations are directly applied to their hospital account(s).

Laura's Journey with Childhood Acute Lymphoblas...

This week has been incredible. Little Laura has been fighting hard with her therapy and this week was a tough one. But you wouldn't know it by watching her! She is a tough little munchkin and a fighter. We are SO PROUD!
